

Product features

- **Excellent UHF RFID Reading And Writing:**

High performance UHF reading and writing module, high sensitivity antenna, the read-write distance can reach up to 5m, reading speed of 50 tags per second.

- **Rechargeable Dual Batteries:**

Rechargeable polymer lithium battery, the device can work continuously for more than 12 hours with built-in 3800mAH battery and external 3200mAH battery built-in the handle.

- **Convenient and Comfortable Handle:**

Fashionable and ergonomic design, convenient and comfortable handle eases long hours of handling for the user.

- **High-Speed Operation Performance:**

Adopts congregating identification technology, can rapidly read all dense tags and reduces blind spots or error rates when reading large quantities of single tags.

- **Resourceful Configuration:**

Adapt all kinds of scanning engines, supports WI F I/ Bluetooth /WC D MA/EVDO/G P RS etc. communication transmission modes.

- **Always-available Wireless Connection:**

Supports 802.11 a/b/g/n full-band wireless communications and maintains real-time connection with the system to ensure high efficient operation.

Applications
