***Particularly designed for SMT components package.***

### **Application**

High efficiency assisting equipment of SMD materials control. It make use of the corresponding relationship between the tractive hole of the carrier tape and the pockets, so as to accurately determine the quantity of SMD parts, and achieve fast and convenient counting of the parts.

### **Features**

1. High precision and free from counting errors.
2. All SMD general-purpose reeling packing parts are applicable.
3. Countable for in both forward and reverse directions
4. Simple operation, Easy to load and unload the reel.

### **Specification:**

Electric Source	220-230 V~ ±10% 50Hz 60W/2A
Counting range	1-50000 PCS
Dimension(outer)	450*250*180mm (L*W*H)
Weight	7 kg
